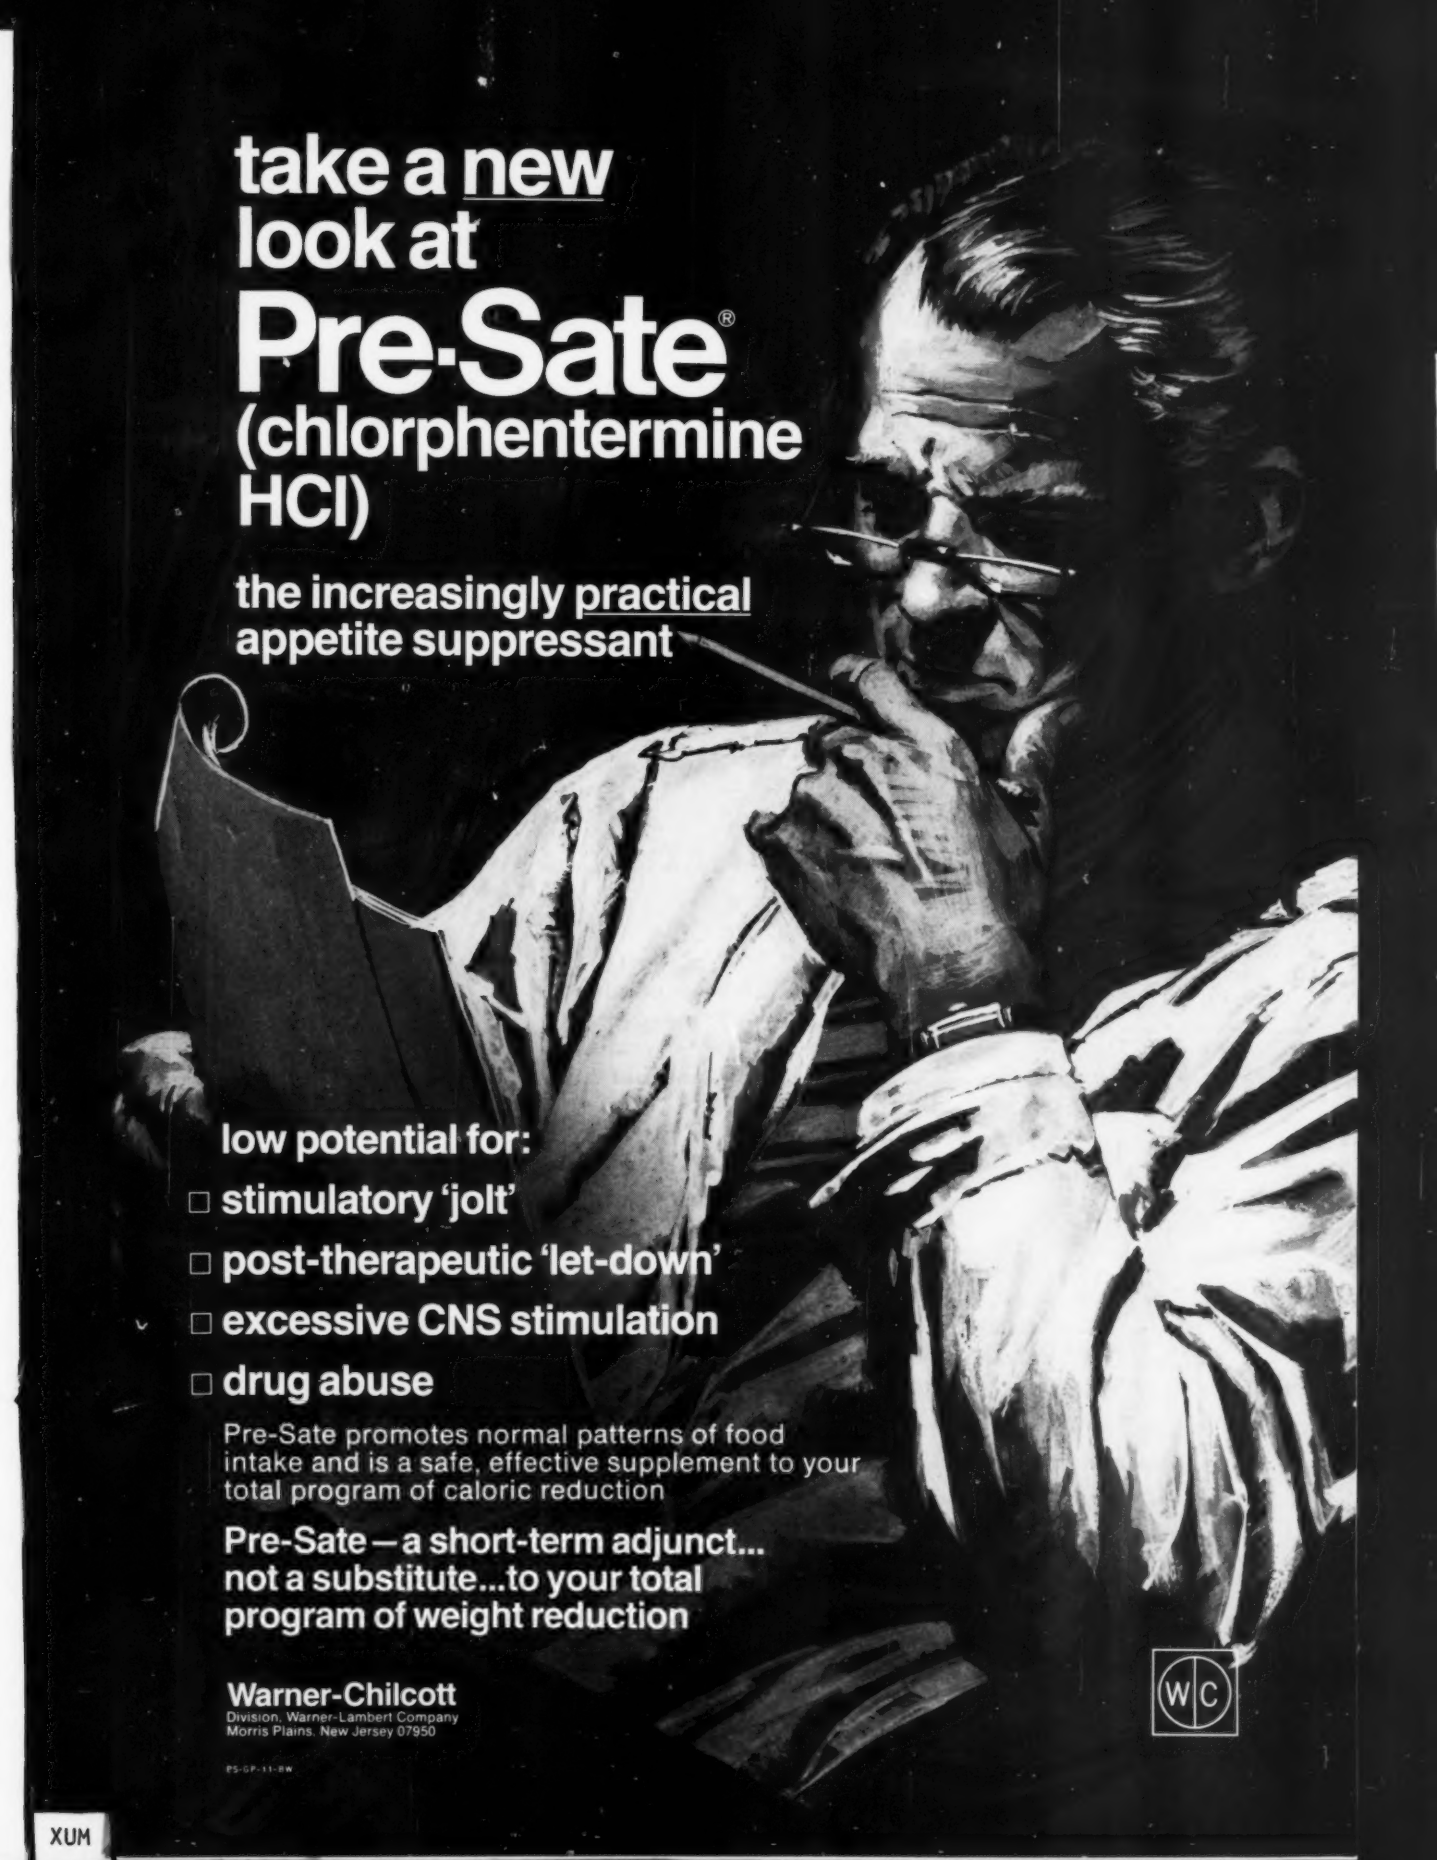
A correction for the May *IMJ*

We have been informed by the Bureau of Narcotics and Dangerous Drugs of a slight mis-statement in the May, *Illinois Medical Journal*. On page 553, in the article treating the Controlled Substances Act of 1970, subtitle "Restriction Classification" it is *not correct* that any practitioner dispensing drugs must also file form 225B. A physician who obtained a new BNDD number via filing of form 224A is entitled to dispense drugs. Form 225B is for the manufacturer, distributer or researcher and is not applicable to the average practicing physician unless he is engaged in manufacturing, production or research.

XUM



take a new look at
Pre-Sate®
(chlorphentermine HCl)
the increasingly practical appetite suppressant
low potential for:
□ stimulatory 'jolt'
□ post-therapeutic 'let-down'
□ excessive CNS stimulation
□ drug abuse
Pre-Sate promotes normal patterns of food intake and is a safe, effective supplement to your total program of caloric reduction
Pre-Sate—a short-term adjunct... not a substitute...to your total program of weight reduction
